- Russian - Fluent

NIKITA CHUMAK

Python Developer

SUMMARY

I possess a strong understanding of the software development process and its lifecycle. Additionally, I have excellent expertise in Python (Django, Flask, FastAPI, data science), proficiency in working with databases (SQL, NoSQL), and a solid grasp of HTML and CSS. I am adept at working both independently and collaboratively within a team. With experience in project leadership, I am positioning myself as a Junior Python Developer. My communication skills are well-developed, and I am always open to learning new technologies.

PROJECT EXPERIENCE

Data Science (2023-2024)

In process

Instagram Killer (2023)

The "Instagram Killer" application is an innovative platform for saving and processing photos with secure authentication through JWT tokens and different roles for users. Group project. Was a scrum master, checking for corrupted files, adding interaction with images and images and organizing the team with meetings and so on

Dedalus - Personal Assistant and Organizer (2023)

Dedalus is a personal assistant and organizer built using Python. It allows you to manage contacts, notes, weather information, and more. Group project. Was a team leader, responsible for checking work and team meetings. Wrote the basic logic of adding contacts, notes and the logic of program commands. Also participated in the programming of tags for notes

WORK EXPERIENCE

Handball player (2016-2024)

Ukraine/France

Part of my life has been dedicated to professional sports, which has instilled in me qualities such as self-discipline, time management, perseverance, and many others. I actively participated in national competitions representing Ukraine and continue my involvement in sports in France.

Assistant electrician (2020-2022)

Kyiv company | Kyiv

My first job at a construction company taught me valuable skills such as electrical work, schematic design, installation of wiring and cabling, sensors, switches, and more. One particular skill I acquired was the installation of meters. In general, I learned to work with schematics, applied higher mathematics, and gained knowledge in physics.

Construction works (2018-2020)

Kyiv company | Kyiv

Internship at a construction company equipped me with valuable insights, including hands-on experience in strenuous physical labor, effective communication with team members, and, of course, proficiency in handling tools and understanding geometric principles.

EDUCATION

IT School GoIT (2023-2024)

Python Developer

Lower secondary education (2022 - 2025)

Lycée Benjamin Franklin

Lower secondary education (2013 - 2024)

BSFK (KYIV REGIONAL SPORTS PROFESSIONAL COLLEGE)
